

## Teaching Through Song

My purpose is to share pedagogical techniques related to music and song. My favorite technique involves the singing of Latin songs and carols in December. This gives me an opportunity to address pronunciation including contrasting classical versus ecclesiastical methods, build classroom community, solidify vocabulary, and advertise my program.

During my presentation I intend to share resources of lyrics, explain how to create a classroom in which participation happens, and to discuss the risks and rewards I have encountered as I have used singing in my Latin courses.
